Proximity and security

Newborn babies need a safe place near their mother. The Idaro baby trolley aids the bonding process with the latest technology, and gives young mothers the support they need during the first few days. The trolley's clever C shape makes rooming-in easy – just slide the trolley over the mother's bed (image 4). This lets her be even closer to her baby and see the baby while lying comfortably in bed. The baby trolley is extremely stable. It cannot be unintentionally adjusted or tipped over, so there is no danger for the baby. Flexible height adjustment with a foot pedal makes light work of ideally positioning the trolley close to the mother's bed, while also providing a comfortable working height for caring for the newborn (images 1 and 3). The trolley is designed so that the foot end of its basket can tilt downwards to an angle of up to 15° to allow a direct view of the newborn baby (image 2).

Design and accessories

The Idaro baby trolley rolls on adorable castors with bear faces and allows newborns to be transported safely. The mobility of the trolley can be controlled by four castors, each featuring a brake. The Idaro colour concept includes the friendly colours yellow, blue or white that match any room decor – either in combination or as single colours. The practical storage basket for holding care utensils is just a hand's breadth away.

Technical data

	Idaro	
Dimensions and weights		
External dimensions	59 x 94,8 cm	
Mattress base (mattress dimensions)	35 x 65 cm	
Max. mattress height	5 cm	
Mattress base height	69,5 – 92,5 cm	
Height of trolley	100,4 – 123,3 cm	
Tilting of basket to reverse - Trendelenburg position	up to 15°	
Safe working load	15 kg	
Total weight	25 kg
