Designed
for well-being
and flexibility

STIEGLMEYER

Combino – the all-rounder

The Combino incorporates all the service features of a modern bedside cabinet and stands out with its **ease of handling** in every situation. It is distinguished by its sturdy stability and a timelessly stylish design. Its **rounded corner profiles** lend it an air of home-like ambience and well-being.

Various sized drawers gliding on roller wheel slides provide all the necessary storage space. They can be designed to be at any desired position within the cabinet body. This means that residents can easily reach all the belongings they need on a daily basis.

It is also possible to opt for a built-in fridge, which is then fitted in place of the middle and lower drawers.

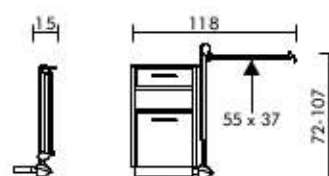

The numerous **practical details** which the Combino affords add up to greater convenience in every day use. Besides a lockable slide out table, these include adapter sleeves for a telephone or intercom system. A reading lamp makes reading a pleasure and also helps the resident to find their way in the dark. The **multifunctional rail provided as standard** (lower right illustration) provides ample space for accessories and can also be used as a towel holder.

The table – for flexible use on the Combino

The Combino affords particular comfort with its stable and **flexible table**. This can be easily attached and detached - **on both sides**. This means that the Combino can be placed on either the left-hand or right-hand side of the care bed and fits in with any existing furniture and room layout.

The **fold-away table** on the bedside cabinet provides a safe place to lay cups and plates and any personal belongings. It is also suitable as a reading table.

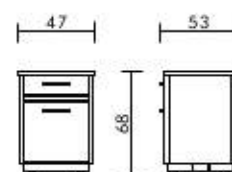

Combino brevo – the compact all-rounder

The Combino brevo is the **smaller version** of the Combino. But it still boasts the same comfort features. There is enough room for a large drawer with roller wheel slides, another small drawer and the lockable slide out table. Rounded corner profiles and a **bedside table with rounded edges** provide a homely touch and enhance safety.

It goes without saying that the **height-adjustable table** on the Combino brevo can also be attached on both sides of the bedside cabinet.
