

Conturo – the sturdy bedside cabinet

Thanks to its **sturdy design** and great flexibility, the Conturo is strong enough to easily withstand all the demands of day-to-day care. It also offers residents many extra practical advantages: All drawers and the storage compartment can be used **from both sides**. If the bedside cabinet needs to be moved from one part of the room to another, its 360° castors make light work of any manoeuvring required. The Conturo is optionally available with brakes.

Its excellent stability, makes it very easy to **adjust the height of the table** by hand. If the resident wishes to use the table to read at or as a desk, the table can be tilted to provide a comfortable angle at which to do so.

The Conturo can also be fitted at your request with a built-in fridge instead of the cupboard unit – this is ideal for keeping refreshments handy on a hot day.
