

EV94S5LO, LUMANO BEDSIDE CABINET

The Lumano bedside cabinet's shape and fixtures make it a particularly high-quality product.

The key points at a glance:

- The Lumano enhances comfort in the daily care routine with its particularly large useful surfaces.
- It has an integrated slide out table under the bedside table which almost doubles the available space.
- The drawers run on roller liners and are therefore particularly smooth-running and quiet.
- The roller-guided drawers open and close easily and quietly.
- The open-sided drawer at the bottom of the cabinet provides plenty of storage space with easy accessibility.
- A simple release mechanism allows the drawers to be easily removed for thorough cleaning.
- The unit comes on four double castors with the front two castors non-swivel to ensure user safety. This enhances the stability of the bedside cabinet when used for support.
